PROFILE

Systems Engineer with 9 years of experience managing technology infrastructure for large organizations including Banco Santander, BNP Paribas, Decathlon, and Zurich. Specialized in identity, access security, and large-scale device management, with experience across hybrid on-premises and cloud environments (Microsoft Entra ID, Intune, Microsoft 365). Currently building on this experience through practical AWS training, working with EC2, VPC, IAM, Auto Scaling, and Lambda, with a focus on secure and scalable architectures.

EXPERIENCE

Aubay Spain (Client: Santander Digital Services) Madrid, Spain
SCCM / Intune Systems Administrator November 2024 – January 2026

- Led the migration of more than **50,000 devices** to **Windows 11** in **9 months**, achieving a **98% success rate** using **SCCM and Intune**.
- Diagnosed and resolved recurring software issues, recovering **90% of affected devices** and reducing support incidents.

Izertis (Client: CBNK Banco) Madrid, Spain
Systems Administrator December 2022 – November 2024

- Managed **identity and email infrastructure (Active Directory, Entra ID, Exchange, and Microsoft 365)** for more than **300 employees**, resolving Level 2 incidents with an average resolution time of **2 hours**.
- Maintained **security patches** across more than **300 devices**, meeting **100% of deadlines**, and participated in the implementation of **MFA**.
- Managed device refreshes and onboarding for more than **100 employees**, configuring accounts, mailboxes, and devices while ensuring **100% file retention** during migrations.

Alten (Client: Decathlon) San Sebastián de los Reyes, Spain
Systems Administrator May 2021 – December 2022

- Analyzed and optimized resource consumption on **Windows devices**, improving their performance and stability.
- Deployed **RFID self-checkout terminals** across **100% of Decathlon stores in Spain**, remotely performing installation, configuration, and commissioning.

Lognext (Client: BNP Paribas) Madrid, Spain
Systems Administrator June 2020 – February 2021

- Managed incidents and changes across **Windows server environments**, contributing to operational availability and stability.

DXC Technology (Client: Zurich, MRW and Campofrío) Avilés, Spain
Systems Administrator April 2018 – June 2020

- Administered **Windows and Red Hat servers, VMware vSphere, and Active Directory**, including monthly patching of more than **1,000 Windows devices**.

EDUCATION

BlockStellart Online
Cloud Computing and DevOps Bootcamp July 2026 – Present

- Practical training in **Cloud Computing and DevOps**, working with **AWS** through hands-on labs and projects covering infrastructure, networking, storage, compute, serverless, Docker, Kubernetes, **Terraform**, CI/CD, Ansible, and observability.

I.E.S. Nº 1 Gijón, Spain
Higher Technician in Networked Computer Systems Administration September 2011 – December 2013
